Diploma No : 4019
Diploma Date : 08.09.2008

This diploma follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international "transparency" and fair academic and professional recognition of qualifications (diplomas, degrees, certificates, etc.). It is designed to provide a description of the nature, level, content, and the status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It should be free from any value judgments, equivalence statements or suggestions about recognition. Information in all eight sections should be provided. Where information is not provided, an explanation should give the reason why.

1. INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

- 1.1. Family name(s) : B.KAMBER
1.2. Given name(s) : ASAN
1.3. Date of birth : 24.04.1981
1.4. Student identification number : 91050014522

2. INFORMATION IDENTIFYING THE QUALIFICATION

- 2.1. Name of the qualification and title conferred:
Bilgisayar Mühendisliği, Yüksek Lisans
Master's Degree in Computer Engineering
2.2. Main field(s) of study for the qualification:
Engineering Sciences
Computer Engineering
2.3. Name and status of awarding institution:
Ege Üniversitesi, Devlet Üniversitesi
Ege University, State University
2.4. Name and type of institution administering studies:
same as 2.3
2.5. Language(s) of instruction/examination:
Turkish

3. INFORMATION ON THE LEVEL OF THE QUALIFICATION

- 3.1. Level of qualification:
Master's Degree
3.2. Official Length of Programme:
2 years, 2 semesters per year, 16 weeks per semester
3.3. Access requirement(s):
Undergraduate Degree,
Acceptable score on a recognized graduate exam.
Acceptable score on LES (centralized graduate entrance exam) or equivalent GRE, GMAT
Certificate of English Proficiency

4. INFORMATION ON THE CONTENTS AND RESULTS GAINED

- 4.1. Mode of study:
Full-time
4.2. Programme requirements:
The Master's Degree is awarded to students who have;
- successfully completed at least 7 different graduate courses having totally minimum 21 local credits (52.5 ECTS credits)
- given a graduate seminar (7.5 ECTS credits)
- taken special studies course on the thesis subject (10 ECTS credits)
- prepared and defended a thesis (50 ECTS credits)
- obtained a cumulative grade point average of at least 70 on a 100 scale and got no failing grades
Objectives
The objectives of the graduate study in the Computer Engineering Department are to develop a research oriented study in the field. For this purpose, theoretical work and applied work is performed in several areas of the field. The courses given in the graduate programme of the Computer Engineering Department are mainly from the topics of Software Engineering, Networks, Computer Security and Data Management. Based on these courses and the current technological advances, it is aimed to perform research that is based on the literature.

4.3. Programme details: (e.g. modules or units studied), and the individual grades/marks/credits obtained:

8. INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

The basic structure of the Turkish National Education system consists of four main stages as pre-school education, primary education, secondary education and higher education.

Pre-school education consists of non-compulsory programmes whereas primary education is a compulsory 8-year programme for all children beginning from the age of 6. The secondary education system includes "General High Schools" and "Vocational and Technical High Schools". Higher education is defined as all post-secondary programmes with duration of at least two years. The system consists of universities (state and foundations) and non-university institutions of higher education (police and military academies and colleges). Each university consists of faculties and four-year schools offering Bachelor's level programmes, the latter with a vocational emphasis, and two-year vocational higher schools offering short cycle (Associate's) level programmes or a strictly vocational nature.

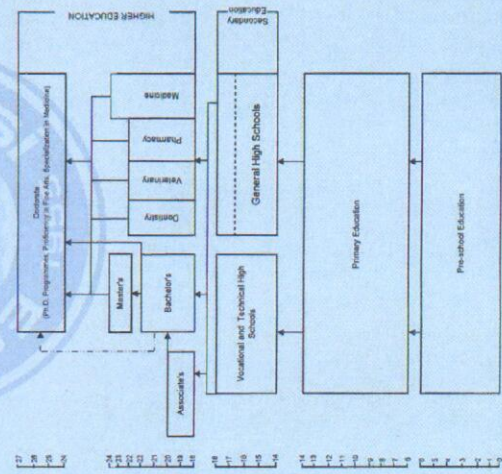

The Higher Education Law No. 2547 is the main law, which governs the higher education in Turkey. All universities (both state and foundation) are subject to the same law and regulations. All state and foundation universities are founded by Law.

Admission to higher education is based on a nation-wide Student Selection Examination (ÖSYM). Candidates gain access to institutions of higher education based on their composite scores consisting of the scores on the selection examination and their high school grade point averages.

Graduate level of study consists of the Master's Degree (Yüksek Lisans Diploması) and the Doctoral Degree (Doktora Diploması). There are two types of Master's programmes: with and without a thesis. The Master's programmes with a thesis consist of a minimum of seven courses, one seminar course, and thesis. The duration of the Master's programmes with a thesis is two years. Non-thesis Master's programmes consist of a minimum of 10 courses and a semester project. The duration of the non-thesis Master's programmes is one and half years. Doctoral programmes have a duration of four years which consists of completion of courses, passing a doctoral qualifying examination, and preparing and defending a doctoral dissertation. Medical specialization programs are equivalent to doctoral level programmes and carried out within the faculties of medical schools with hospitals.

The Higher Education System is regulated by the Council of Higher Education (Yüksek Öğretim Kurulu-YÖK). Established in 1981, the Council regulates the activities of higher education institutions with respect to research, governing, planning and organization.

GENERAL STRUCTURE OF THE TURKISH EDUCATION SYSTEM

NB — Since 2003, the Bachelor's degree holders whose performance at Bachelor's level is exceptionally high can enlist directly to the Doctoral level programmes.
